

DHAPO 12-PORT 48V POWER DISTRIBUTION STATION

This 3U rackable station is dedicated to 48...60V power distribution to DHASA systems. It can provide up to 120W per port.

Each port is electronically protected, filtered, with its own power and energy meters, and can be powered on or off from front panel or remote control (Telnet on ethernet fiber). For a full-rated use, an 1.5 kW (minimum) 48..60VDC external power source is required, a second one can be connected for redundancy.

Main features

- 1+1 power DC inputs
- 12 filtered outputs with 2.5A electronic breaker
- Configuration through front-panel or ethernet (1 optical fiber)
- Power meter, energy meter on each port

Applications

- FEE DHASA systems
- General telecom products
